

Bill Validator

- Fast and high acceptance rates
- Single-build for worldwide applications
- Field proven last note image display

The Ardac Elite bill validator offers fast and high acceptance rates, resulting in increased customer satisfaction, whatever the market. The single build Ardac Elite has a wide 85mm opening for accepting world currencies and industry-standard barcode tickets.

Bill Acceptor

Key Features

- Available with ccTalk DES encryption
- Unique last bill technology
- Full note scan capability
- Exceptional first time acceptance of new and street-grade bills
- Exceptional detection of fraudulent bills
- Single unit for all currencies
- Wide 85mm opening
- Easy to maintain, modular design
- Choice of bezels, looms and protocols
- USB connectivity for rapid download of software and bill tables
- Simple diagnostics
 - via LED status indication system
 - via comprehensive support tools
- Optional four-way barcode reading
- Optional sensors sealed to prevent dirt ingress

Last Note Image Display

While traditional acceptors sample only part of a bill, the field proven Ardac Elite takes an image of the whole bill. The last note image display function can also be used to easily resolve player disputes (patent pending).

Retrofitting

The Ardac Elite can be retrofitted to most platforms. Retrofit kits include interface looms, bezels and communication protocol software. Whatever the market or application, the Money Controls team is always available to discuss customers' specific needs and pride themselves in producing innovative solutions.

Ticket Ready

The Ardac Elite's 4-way barcode reader, allows customers to insert barcode tickets in any orientation, increasing acceptance rates and user satisfaction.

Field Proven

Approved and integrated by all major world-wide OEM's, Money Controls' Ardac Elite is installed in thousands of venues around the world. Since its launch in 2006, the Ardac Elite has repeatedly proven its performance in gaming, transportation and kiosk applications. The sealed sensors ensure reliable performance in even the harshest conditions, backed by Money Controls' worldwide applications support structure.

Product Integration

Product Integration shows Money Controls' innovation at its very best and the Ardac Elite is no different. The Ardac Elite comes with a range of industry standard protocols and interfaces including ccTalk. A single USB connection provides simple software integration through a simple API. Also available with ccTalk DES encryption.
